Test result / Classification	When operated under the specified test conditions, the battery-powered Nutrunner ICB-A21-07-i06-HMI-H in combination with Power Supply Unit 950 and Battery 14V is suitable for use in cleanrooms fulfilling the specifications of the following Air Cleanliness Classes according to ISO 14644-1:
------------------------------	--

Test parameter(s)	Air Cleanlines Class
Screwdriver (with Power supply) Installation position: horizontal $v_1 = 200\text{ rpm}$ ; $v_2 = 50\text{ rpm}$	6
Screwdriver (with battery) Installation position: horizontal $v_1 = 200\text{ rpm}$ ; $v_2 = 50\text{ rpm}$	7
Power supply	1
Overall result	7

Please note: Transport damages, incorrect installation, oil leakage, aging behavior, corrosion etc. can influence the test result.

The measuring devices used for the qualification tests are calibrated at regular intervals; their results can be traced back to national and international standards. In cases where no national standards exist, the test procedure implemented complies with the technical regulations and norms applicable at the time of the test. The relevant documentation can be viewed on request at any time.

Detailed information and parameters of the test environment can be found in the Fraunhofer IPA test report.
